Speech & Language Support for 3-5s

This course is written for those of you working in pre-school provisions. It links research on early language development with best practice to give you up to date theoretical knowledge and practical tools to promote and extend communication. It will provide practical strategies and innovative ideas wherever you work. This training runs over 10 sessions and you can complete it either through face to face delivery or blended e-learning. It can also be delivered as an intensive three day programme and is available as e-learning only without the live webinars or accreditation.

What does this course teach?

1. What is communication?

- Identify the processes involved in communication
- Demonstrate the wide range of communication difficulties.

2. Communication Friendly Settings, Adult-child interaction and working with families

- Consider what a Communication Friendly Setting is and how to achieve it
- Understand the effect of adult-child interaction on the development of communication skills
- Reflect on how to engage families to support their child's communication skills.

3. Listening, looking and understanding spoken language

- Understand the development of listening and attention and how to support this
- Explore the importance of non-verbal communication behaviours
- Reflect on the use of visual information to help children learn and understand.

4. Promoting the development of vocabulary

- Explore how children learn words and the typical pattern of vocabulary development
- Discuss strategies to help children develop a rich and varied vocabulary.

5. Modifying adults' speech to help a child understand language

- Practise modifying the adult's language through an understanding of information carrying words.
- Consider how to use information carrying words to develop all aspects of communication.

6. The Blank Language Scheme (or Language for Thinking)

- Discuss supporting verbal reasoning skills, including why & how questions, inferencing, sequencing, predicting
- Practise modifying the adult's language accordingly.

7. The language journey - Developing expressive language skills

- Develop strategies to encourage the use of sentences and expressive language
- Discuss how to support children learning additional languages
- Share ideas to develop narrative skills.

8. Play for language

- Explore the link between play and language development
- Know how to support language and communication through play
- Identify skills required for successful social communication and share ideas as to how to promote these.

9. Supporting children with unclear speech and developing phonological awareness skills

- Know the development of speech sounds.
- Discuss strategies to support children with unclear speech.
- Consider the link between speech, reading and writing.
- Review phonological awareness and the four main components.

10. Management of stammering, sharing information with parents and course reflection

- Explore the appropriate management of children who stammer.
- Consider a model of communication to share with parents.
- Reflect on what has been achieved through attending the course.

“ Very worthwhile and enlightening. It has already proven of great value in our approach to children in my setting with all members of staff - giving some great ideas and insight into children's communication and speech development. ”
